[First Nano](#), a Division of CVD Equipment Corp. specializes in *accelerating the commercialization of tomorrow's technologies™* by designing and manufacturing custom chemical vapor deposition process equipment solutions suitable for the synthesis of a wide variety of 1D, 2D and 3D nanostructures/materials. Our [EasyGas™](#), [EasyTube™](#), [EasyCrystal™](#) and [EasyExhaust™](#) systems are customizable for a range of nanomaterials that intersect cross-functional disciplines in applied physics, biotechnology, chemical, and mechanical engineering fields, and enable the development of tomorrow's smart material in the fields of semiconductor, solar, aerospace, energy, batteries, MEMS, etc. Through our Application Lab and our CVD Materials division we also provide custom CVD material process development and manufacturing services.
