

April 2, 2020

Dear Customers and Business Partners,

As Global concerns about the pandemic COVID-19 (coronavirus) outbreak intensify, CVD Equipment Corporation's priority has been and continues to be the health and safety of our employees, their families and the society we live in. With the local "Shelter In Place" regulations in New York State we have decided that in alignment with our commitment to the health of our stated stakeholders we have suspended normal operations in our Central Islip, New York facilities and associated field support until further notice. We continue to provide telephone and internet support where possible and maintain a skeleton crew as needed for essential requirements. We remain committed to providing the highest level of customer service and support during this unprecedented and challenging period and we continue to evaluate options and do our utmost to minimize the duration and extent of the interruptions to our normal course of business. CVD company contacts will continue to provide you updates and assist in your requests, requirements and needs where possible. Please continue to partner with us knowing that our combined patience, persistence and commitment will drive us to overcome this global challenge.

Going forward, CVD Equipment Corporation will continue to share business-related updates with our employees, customers and business partners as quickly as possible through our website and social media channels.

In the meantime, we encourage everyone to carefully follow the recommendations and guidelines of the Center for Disease Control and Prevention (CDC).

Stay Safe...

Sincerely

Leonard Rosenbaum

President
